0.1 Exercise 10

0.1.1 Graphical User Interface

0.1.2 Summary

- Two images are created, Image 1 contains black boxes with proper spacing, horizontal and vertical separators, circles.
- Combo box is used to select the images. When any image is selected colors and sizes of rectangle are adjusted.
- Sliders are used to adjust the intensity of colors, width and height of rectangles in both images.
- When red slider is adjusted, color of rectangles is changed in image 1 and in image 2, color of black boxes is changed.
- When green slider is adjusted, color of circles is changed in image 1 and in image 2, color of white boxes is changed.
- When blue slider is adjusted, background color is changed in image 1 and in image 2, color of horizontal separator is changed.
- Slider of width and height are used to change sizes of rectangles in both images.
